

1980 Suzuki GS1000ST (Australian/International) Fuel Tank SUZUKI Decal Notes

There have been requests for Fuel Tank decals on the 1980 GS1000ST Australian version, blue paint scheme, for lettering done two different ways. We have seen evidence of both ways, but can't confirm which is correct for the Australian market. This may be due to the fact of owners bringing in bikes from different countries. The one version has a white only interior, with a thicker black border (Type A) and the other version has a slightly thinner black border with a white inner border and a blue interior (Type B). We will leave it up to our customers to determine which version of bike they have for their Country and purchase accordingly. See various pictures below.

SUZUKI

Une conduite facile et agréable grâce

Sans faillir à la réputation des célèbres motos de la série GS, cette moto sportive ne se contente pas d'être belle. La tête de fourche a été spécialement conçue selon les principes de l'aérodynamisme : au fur et à mesure que la vitesse augmente, la tête de fourche est poussée vers l'arrière par la pression du vent pour maintenir la stabilité de la roue arrière et ainsi, assurer une grande tenue de route à haute vitesse. Ces excellentes performances donneront satisfaction au motard le plus exigeant.
